

PDF accessibility remediation

White-label delivery for agencies

We remediate documents to WCAG 2.1 AA and PDF/UA. You keep the client relationship; nothing carries our name.

Rates

Standard document: \$6 per page.

Scanned document requiring OCR: \$18 per page.

Minimum engagement \$150. Turnaround 48 hours. Rush 24 hours at +50%.

Over 500 pages: \$5 per page standard, \$15 per page OCR.

Published vendor rates run \$4 to \$11.50 per page with 5 to 10 business day turnaround. We are mid-market on price and materially faster.

What is included

OCR for scanned pages, with the original page image left untouched.

Structure tagging: headings, paragraphs, lists and reading order.

Document title, language and viewer preferences.

Table header identification and alternative text, both human-reviewed.

A human reading-order check before delivery. This is not optional.

A report of exactly what changed and what still needs attention.

A worked example

A 9-page scanned school board minutes document, published publicly, scored 10 out of 100 before remediation and 100 out of 100 after. OCR was applied to all 9 pages, a full structure tree was generated, and metadata was repaired. All original page images were preserved.

What we do not claim

We are not a certification body and do not issue conformance certifications. We do not offer a compliance guarantee, because nobody honest can.

Automated remediation does not finish the job alone. Reading order, the usefulness of alternative text, and complex table structure require human judgement. We include that review rather than pretend it is unnecessary.

Verify this document

This sheet was tagged by the same pipeline we would run on your client documents. Check it with any accessibility validator, or with our free browser-based checker, which never uploads your files.
